

For large-format circuit breakers outside common standards:

The E212 circuit breaker lockout device prevents accidental activation of electrical circuits during maintenance.

The switch is fixed in the OFF position by E212 and cannot be operated until maintenance work is completed.

Technologies

- Polyamide, partly glass fibre reinforced: durable, resistant, non-conductive
- Easy to use with screw mechanism for safe (tool-free) mounting
- Universal use thanks to large receptacle for switch rocker

Operation and use

- Fuse protection for circuit breakers during maintenance work
- Use without tools, simply attach and tighten with the hand wheel
- For hanging a padlock with a shackle diameter of up to 7 mm

Technical data - E212

Weight	106 g
