NutFix™ 3/8“ blue

TWICE AS SECURE

The NutFix™ Component Security Device provides optimal additional protection for your bicycle’s wheels, making it twice as hard for thieves.

Don’t rely solely on the outstanding quality of your bicycle lock attached to the frame for protecting your mid to high-value bicycle against theft. Many thieves also target individual bicycle parts, stealing wheels or saddles for example. The NutFix™ provides additional security for your wheels against possible theft.

Technologies

- Secure locking thanks to innovative gravitation technology
- Proven technology for a high level of picking protection
- Can be installed using a standard SW 15 open-end spanner
- The anodised surfaces of the caps, available in a range of colours, provide long-term protection against corrosion
- Nuts manufactured from high-quality stainless steel

Operation and use

- Recommended for securing medium- to high-class bicycles

Tips

- To prevent the NutFix™ Component Security Device from being opened, the bicycle must always be standing, attached to a fixed object, perhaps with an ABUS U-lock or BORDO™
