DISKUS® HASPS

The security value of the hasp should always be precisely matched to the respective padlock, because the two security products of hasp and padlock form a symbiosis in which the weakest link becomes extremely relevant to security.

ABUS offers a wide range of security latches at different security levels. You can recognise these hasps, for example, by concealed screws. In addition, hardened steel eyelets for the padlock shackle are encapsulated inside the hasp and thus provide optimum protection against break-in attacks. Together with the appropriate padlock, the hasp then ensures the highest level of security when securing the door and gate. The strong ABUS 140/120 Diskus® hasp is suitable for flush doors, i.e. the door panel and door frame are on one level. The design is matched to the original ABUS Diskus® padlocks so that the shackle is shielded against unlocking tools.

Technologies

- Hasp and hinge pins made of stainless steel
- Tough construction
- Hinge pins protected against attack
- Hardened staple
- Ideal in combination with Diskus® padlocks
- Hidden screws

Operation and use

- To secure valuables/goods of greater value or at a high risk of theft
- Diskus® padlock and hasp for high protection and extreme corrosion resistance
- To be used with a padlock, ideally a Diskus® padlock (60mm – 80mm)

Variants

- Size 120: Suitable for inlaid doors, i.e. where door and door-frame are flush
- Size 190: Double hinged, suitable for overlaid doors, i.e. where door and door-frame are not flush, and corner solutions
