PROTECTED ALL AROUND

With the AirDrop, ABUS offers its first full-face helmet, providing the best protection for days spent in the bike park or riding rugged downhill trails.

Enduro racers, downhillers, E-MTB riders and alpine adventurers are always pushing the limits of mountain biking. Increased protection used to mean heavy, hot and claustrophobic full-face helmets. New technologies like our EVA collarbone protector inserts, breakaway visor attachments and side communication channels bring real benefits to bike parks and the backcountry. If gravity is the thrill you need, the AirDrop is the MTB helmet for you.

Technologies

- In-mould manufacturing for a durable connection to the outer shell with shock-absorbing helmet material (EPS)
- Zoom Ace FF: Adjustment system to fit the head circumference
- Collarbone protection edges
- State-of-the-art QUIN technology: Integrated acceleration sensor that detects and measures falls. In the event of a fall, the system notifies a pre-defined contact person
- Breakaway visor bolts
- Ambient Sound Channels (ASC) for improved hearing.
- Breathable cheek pad inserts
- Design suitable for goggles
- Double D-ring buckle system
- MIPS: Impact protection that protects the brain, especially when the cyclist's head hits the ground at an angle during a fall.
