

TRUST THE ORIGINAL

Our Diskus® 20 padlock has proven its worth in securing very high-value items or objects at very high risk of theft.

The round design with narrow shackle opening and the welding seam ensure solid safety! The Diskus® 20 padlock protects your valuables stored in trucks or vans or behind factory gates, for example. The lock is made of stainless steel inside and out, and the shackle is made of special hardened steel, which makes it particularly resistant to picking. The seam that holds the two stainless steel housing pieces together is also hand-welded on the Diskus® 20, which ships from our production facility in Germany. This means that the two halves cannot be easily broken apart and the Diskus® secures your valuables and items very well. Tip: Combine the Diskus® 20 with the matching hasp 140.

Technologies

- Stainless steel - outside and inside
- Additional protection against sawing
- Shackle made from high quality stainless steel
- ABUS-Plus disc cylinder: highest protection against manipulation, extremely high number of key differs
- Cylinder cover – maximum protection against dirt and water spray
- Sophisticated Diskus® welded seam for highest break resistance
- Original Diskus® design: 360° protection
- Key retaining: key is needed for locking (lock retains key until locked)
- Made in Germany
- 2 keys

Usage

- To secure valuables/goods of great value or at a very high risk of theft
- To secure e.g. warehouses, industrial sites, factory gates, containers and lorries
- Ideally used with ABUS Diskus® Hasp 140: virtually impossible to attack shackle

Tips

- This traditional lock comes in a wide range of sizes

Variants

- Sizes: 70, 80 mm

Technical Data - 20/70 kd.

Depth e	30,5 mm
Finish	stainless steel
Height f	70 mm
