## FOR HIGH SAFETY REQUIREMENTS - WATER-PROTECTED

The brass 83WPIB padlock is completely weatherproof and ideal for use outdoors or on boats and ships.

Thanks to the synthetic-coated lock body made of solid brass and the rustproof shackle made of hardened stainless steel, the lock is extremely resistant to corrosion and weather. The cylinder protection with drainage channel, which transports moisture penetrated into the lock to the outside, also makes the ABUS padlock 83WPIB a reliable and durable companion.

---

## Technologies

- Lock body made of solid brass
- Stainless-steel shackle
- As required, either automatic locking = locking without a key by pressing down on the shackle, or key-retaining = locking only with a key (Z-bar)
- Extremely weather-resistant due to the full plastic coating, including cylinder protection and sealed shackle holes; drainage channels transport moisture that has penetrated the lock back out
- Shackle can be exchanged within seconds
- RK: cylinder can be re-keyed to match an existing key

## Usage

- To secure assets and objects of greater value or those at a high risk of theft
- Suitable for industrial or commercial doors/gates, warehouses, trailers, containers and garages
- Ideal for severe weather conditions (e.g., in sea and port areas)
