

B810 Permit Redbox™ incl. wall bracket

Seite 1 von 1

PERMIT-TO-WORK TAKEN TO THE NEXT LEVEL

Common processes for safely shutting down systems in plants are often accompanied by documents called permits to work.

The B810 Permit Redbox™ enables not only the storage of machinery and system locks, but also the integration of these documents. It thereby combines precision system security with the necessary safeguarding of the permits in a large, lockable viewing window. For more security and transparency during maintenance.

Technical data - B810 Permit Redbox™ incl. wall bracket

Weight [g]	3423 g
colour	red
