

MicroSD card, 64 GB

Art.-Nr. TVAC41110

Seite 1 von 1

The microSD card is an extremely compact storage card with a storage capacity of 64 GB and a write and read speed of up to 100 MB/s (Class 10). This makes the card, which is smaller than a fingernail, an optimal storage medium for local recording in an IP camera and allows it to act as backup storage. The card meets the high standards required for the reliable recording of video data in 24/7 operation, even in adverse operating conditions.

Technologies

- Ideal for storing video data during long-term continuous operation
- High write speed of up to 20 MB/s (class 10)
- Tested for adverse operating conditions: shock-resistant, waterproof and able to withstand extreme temperatures

Technical data - MicroSD card, 64 GB

Dimensions	15 x 11 x 1,0 mm
High-speed class	Class 10
Max. operating temperature	85 °C
Max. reading speed	100
Min. operating temperature	-25 °C
Storage capacity	64
