

8-Port PoE Gigabit Switch

Art.-Nr. ITAC10110

Seite 1 von 2

Technology for use in professional security surveillance systems.

The 8-Port PoE Gigabit Switch was specially developed for use in professional and high-resolution video surveillance systems and provides eight gigabit downlink PoE ports, one gigabit uplink port and one uplink slot for a gigabit SFP module.

Use PoE instead of power supply unit.

Each downlink port delivers up to 30watts PoE output power. The switch is therefore highly suitable for directly operating ABUS IP cameras, which means that no additional power supply unit is required.

A total PoE output power of 120watts is available. For example, simultaneous operation is possible for up to:

Eight PoE network devices

Four PoE+ network devices

Four PoE and two PoE+ network devices.

Installation made easy.

The compact design and the mounting tabs provided make it quick and easy to install the switch in various locations.

Technologies

- Connections: 8 x PoE gigabit (downstream), 1 x gigabit (uplink) RJ45, 1 x gigabit (uplink) SFP
- Supports PoE and PoE+
- Plug & Play, no configuration required
- Robust design, easy to install anywhere

Technical data - 8-Port PoE Gigabit Switch

DC voltage supply	48~57 V
Dimensions	(LxWxH) 200 x 102 x 27 mm mm
Height	27 mm
Length	200 mm
Max. PoE power per port	30 Watt
Max. humidity	95 %
Max. operating temperature	45 °C
Min. operating temperature	-10 °C
Net weight	0,5 kg
Network Standards	IEEE802.3, IEEE802.3u, IEEE802.3ab, IEEE802.3Z, IEEE802.3 X
Network access	Downstream: 8x 10/100/1000Base-T (PoE), Uplink: 1x 10/100/1000Base-T Ethernet Ports & 1x 1000Base-X SFP

Technical data - 8-Port PoE Gigabit Switch

PoE power total	120 Watt
PoE standard	802.3af/at (PSE)
Power Pin Assignment	1/2(+), 3/6(-)
Power consumption	5 W
Width	102 mm
