

WITH REVERSIBLE KEY

We recommend our 98 Titalium monobloc padlock for hard-to-reach locking areas with a very high risk of theft.

In some locking areas it is not possible to use a conventional padlock. This may be the case if the area to be secured does not have enough space. We built the lock so that the key fits in horizontally from the side. A robust, straight locking bolt and a solid lock body ensure high security with low weight in the 98 Titalium. The 12 millimetre thick locking bolt is made of hardened steel. The small space between the locking bolt and the lock ensures that potential lock-pickers have no opportunity to use larger tools, such as bolt cutters. The padlock is opened with a reversible key. This is a quality and security feature and stands for high operating convenience. Because no matter how you insert it into the lock, the reversible key always fits.

Technologies

- Lock body made from TITALIUM™ special aluminium – high security with low weight
- 12 mm special hardened steel shackle
- High precision reversible keyway with 150,000 key differs
- Automatic locking: Locking without key by pushing the shackle
- Paracentric keyway for increased protection against manipulation

Operation and use

- To secure valuables / goods of greater value or at a high risk of theft
- To secure doors, gates, cupboards, tool boxes, cellar windows, sheds, switchboards, etc.
- Ideally used with ABUS hasps No. 130

Variants

- Sizes: 70, 90 mm
