

Chaining objects

Padlocks in combination with cables and chains are ideal for individually securing a wide variety of objects.

High-security chains with hardened staples are not only suitable for securing a two-wheeler. Ladders, dustbins or other objects outside the company can be secured in this way. Cables and chains also offer versatile security options in public areas, from the chairs outside cafés, to the machine on the construction site.

Technologies

- Security chain made of special hardened steel
- Fabric sleeve prevents paint work and chrome from damage
- Chains in barrels: customized lengths available
- Top security against all types of aggressive attacks

Operation and use

- Meets special requirements of insurance companies
