

Wireless door lock actuator HomeTec Pro CFA3000 silver

Seite 1 von 2

SIMPLE, FAST, PRECISE

High operating comfort at the touch of a button: The radio door lock drive not only unlocks, the door also springs open a crack.

Are you looking for a modern way to open your doors? Whether in the private or commercial sector, this radio door lock drive works quickly and precisely, is easy to install and award-winning. The product is installed by clamping, gluing or screwing. No special cylinder is required. The drive is integrated into the existing locking system and can then be operated by remote control or by entering a number code. The German Gerontology Society awarded him a seal of approval.

Technologies

- No special cylinder required – integration into existing lock system possible
- Designed for Euro profile cylinders according to DIN 18252 and DIN EN 1303 with emergency function
- Easy, flexible and wireless installation: clamp, glue or screw
- Semi automatic programming of the central unit
- Intelligent motor controller
- Maximum security due to AES-128 bit encryption
- Power supply by battery (4 x AA batteries included)
- Cylinder protrusion of 7–12 mm required on the inside of the door

Operation and use

- For house and flat entrance doors, office and service rooms
