WALL BRACKET FOR SPHERICAL DOMES BLACK (IPCS54611B, IPCS58611A)

Get your cameras in perfect position!

With this wall bracket (colour: black) you can mount black spherical dome cameras in the correct position on the wall.

Its robust aluminium construction ensures a long service life with high weather resistance. Its compact size (dimensions: 120 x 184 x 232 mm) makes it the ideal solution for mounting in areas with limited space. Thanks to internal cable routing, the wall bracket can be installed in a space-saving manner and without disturbing cables. At the same time, the camera's connecting cable is protected against weather or moisture, damage and sabotage.

The wall bracket is compatible in shape and colour with the IP spherical dome cameras of the IPCB54611B and IPCS58611A model series (and identical models). With the black housing, the bracket can also be placed very inconspicuously on a dark façade. In relation to its load capacity of up to 4.5 kg, its own weight is only 0.7 kg, which makes installation and overhead mounting much easier.

Technologies

- Compatible with IPCB54611B, IPCB58611A
- Internal cabling is possible
- Sturdy aluminium construction for indoors and outdoors
- Colour: Black
