

388 Nemo Evo black

Technologies

- Hardened precision-cast lock body
- Includes lock lubricant
- Highly corrosion resistant (cylinder and lock body)
- Rattle prevention
- Very compact construction
- Forced locking function – after locking, the key can only be removed if the lock is properly closed
- Plus cylinder with unique key service (keyed-alike option with other marine products possible)

Usage

- Can be used with all portable outboard motors (usually < 25 hp)
- No need to drill through the hull, it is only necessary to drill a few millimetres deep
- Perfect security and function, even at extremely low temperatures and in salt water
- All the materials needed to replace the original mounting are included
