

300 red

Technologies

- 10 mm locking bolt
- The locking bolt is made of specially hardened steel
- The lock body is made of impact-resistant cast metal
- ABUS quality cylinder with easy-to-use reversible key
- Two keys are included in the scope of delivery
- Manually operated keyhole cover to protect against dirt and corrosion

Tips

- For increased security, the motorbike should be secured to a fixed object with another lock for longer parking periods
- A smaller version of the lock is available with thinner locking bolts (Provogue 305)
