

ARMOURED AGAINST THEFT

Flexible cable lock incorporating dual protection: with the IVERA Steel-O-Flex™ 7200, you can lock up your bike with double the security.

A good choice for those who want to park their bike without worries. The IVERA Steel-O-Flex™ 7200 provides protection against thieves with a steel cable, which itself is covered with overlapping steel shells. Nobody can cut through this combination easily. The mesh-covered sheath makes for a flexible connection - an added bonus for daily use.

Technologies

- 22 mm thick, overlapping steel shells protect the internal steel cable
- New, functional, durable and highly flexible synthetic sleeve prevents damage to paintwork
- The steel shells, the housing and the structural parts of the locking mechanism are manufactured using specially hardened steel

Operation and use

- Good protection at medium theft risk
- Recommended for securing good bicycles
- The longer the cable, the easier the bicycle can be locked to a fixed object

Tips

- Due to the steel shells, the Steel-O-Flex™ locks reach a significantly higher security than common cable locks, yet maintaining high flexibility (Double Protection)
