

Element 290 red

Technologies

- 10 mm locking bolt
- Very easy to use thanks to the push-down cylinder which automatically locks the bolt into place when closed
- The bolt is made of specially hardened steel
- Two keys are included in the scope of delivery
- A memory cable which is included with the lock serves as a reminder to prevent accidental pulling away when the motorbike is still secured

Usage

- Basic protection for when there is a low risk of theft
- Recommended for securing scooters

Tips

- Brake disc locks are the most compact type of motorbike lock which makes them easy to transport
- For increased security during longer parking periods, it is advisable to also secure the motorbike to a fixed object
