

SMALL AND UNIVERSAL

Small dimensions, great safety: This electric door opener is quickly attached and universally applicable.

Do you want to equip your apartment building, your company or a commercial property with an electric door opener that is easy to install, child's play to operate and safe at the same time? The ET80 meets your criteria. Its latch can be easily aligned with the latch of the respective mortice lock. Assembly is done quickly because of the small dimensions. Nevertheless, the opener is a powerhouse. It can withstand a resistance of over 300 kilograms.

Technologies

- Rated voltage 8-14 Volts, suitable for AC/DC
- Slim dimensions due to the symmetrical construction
- With latch adjustment and mechanical unlocking
- Power consumption: 0,7 A bei 12 V AC
- Electric resistance: 14 Ω bei 12 V AC
- Resistance against attacks 3.000 N

Operation and use
