

Strike plate SSK hammerblow gold (L 24)

DOUBLED SECURITY

Corridor doors must also be reliable. That's why a matching strike plate is simply a must.

In combination with a mortice lock, strike plates are part of the basic equipment for your house and flat doors in terms of security. This strike plate made of steel is suitable for blunt corridor doors. There are lateral flaps in the area of the trap which ensure that the surface of the frame is not damaged.

Technologies

- Steel strike plate
- With lateral flap in the latch area

Operation and use

- For edgeless apartment entrance doors
- SSH: For flush main entrance doors

Variants

- Finish: hammer blow gold
- For DIN right and left doors
