

Magnetic closure JC4500 MARC

Seite 1 von 2

THIS DRAWER STAYS CLOSED

Secure your drawers with the MARC magnetic lock!

You have to face the facts: At some point, your child will have figured out the mechanism of a simple drawer lock and will be able to open it independently.

Some things you would still like to keep away from your offspring - for example medicines, toxic cleaning agents or scissors and sharp knives. Our MARC magnetic lock secures drawers and cupboard doors for such cases, because it can only be opened with the corresponding magnetic key.

Technologies

- Childproof: can only be opened with the special magnetic key
- Simple installation: stick or screw – no drilling required!
- Up to a wood thickness of 25 millimetres

Operation and use

- Discreet, invisible lock
- For drawers and cupboards
