STAIRCASE TRIP HAZARD

Stair gate TIM secures stairways and protects little bullies!

When romping around, it's often high up: catching, running, crawling or scrambling - there are usually no limits to the ingenuity of little tomboys.

To ensure that steps don't put a rude halt to happy play, we recommend: Secure every stairway, for example with our stair gate TIM. It ensures that it does not suddenly go down the steps unintentionally.

Technologies

- The width can be adjusted from 60 to 107 centimetres
- Recommended minimum distance between door and stair gate and wall/stair posts: 12 millimetres. Maximum distance: 62 millimetres
- Distance between the bars: approx. 55 mm
- Tested according to: DIN1930:2011

Operation and use

- For internal doors and staircases
