MAKES LIFE EASIER

You can also lock your terrace door at the touch of a button. Simple and secure.

Want to go for a jog, linger a while in the garden or take the dog out? Exiting your house through the terrace door becomes safe to do with the radio window lock drive. The product from the HomeTec Pro series allows you to lock your terrace door by simply pressing a button. You can still lock it manually as well. If burglars try to gain access to your home, a 111 decibel alarm can send them fleeing. Optionally, you can also open the door using a programmable code. The electric window drive was recognised with an award by the German Society for Gerontotechnology for its user-friendly functionality.

Technologies

- Optimum ease of use thanks to optional wireless remote control and/or wireless keypad
- Maximum security through AES 128 bit encryption
- 3D alarm sensor system triggers a 110 dBA alarm as soon as a break-in attempt is detected
- Fully automatic pairing of the power unit
- Mechanical closing remains possible, electronic control works even when the locking cylinder is pressed in thanks to dual drive

Operation and use

- Opening and locking the patio door at the push of a button or by entering a code

Variants

- Colours: brown, white, silver
