

SECURITY WITH ONE CLICK

Additional window lock for double casement windows with middle bar.

Your double-hung windows are beautiful, flooding your home with warm sunlight in particular. But they are also a security risk if they are inadequately protected against break-in. The additional security lock solves the problem. The solid double turning bolt achieves simultaneous interlocking with both window wings. Nevertheless, the fuse can be operated comfortably. Because a simple click mechanism is all that is needed to lock the window. The lock case is attached to the middle bar during assembly. The prerequisite for fitting is a gap between the sashes of 18 to 35 millimetres.

Technologies

- Tested by independent Test Institutes
- Resists more than one ton load
- Open/closed position visible
- A space of 18 - 35 mm between the windows is required for fitting the lock
- Incl. two keys
