

The wall mount is an optional accessory for dome cameras in the "Advanced" series (IPCA). It is used to carry out a professional flush mount of the dome camera in a horizontal position. The sturdy aluminium construction makes it possible for cabling to be both protected and laid internally, and is suitable both for indoor and outdoor use. Compatible with the following models: IPCA72520, IPCA73500 and IPCA76500

Technologies

- Compatible with IPCA72520, IPCA73500, IPCA76500
- Conceals and protects wiring both indoors and outdoors
- Internal cabling is possible
