ABUS IP video surveillance 2MPx motor-zoom lens dome camera

Keep a close eye on all situations with variable zoom

With a detailed, high resolution of 1920 x 1080 pixels (2 megapixels), the TVIP42520 2MPx Motor Zoom Lens Dome Camera records 25 frames per second. The infinitely variable 4x optical zoom enables you to zoom in on any situation of interest with clear image details and to zoom out again to gain an overview of a larger area. This makes the camera a particularly versatile surveillance solution for the home or the office. With its sturdy, weather-protected housing featuring protection class IP67, it can be used both indoors or outdoors.

Ideal for use in entrance areas

The camera is ideally suited for monitoring entrance areas thanks to its built-in motion sensors and powerful True WDR function for backlight compensation. It also has infrared LEDs, which are activated in the dark. The installation is carried out without cable clutter: Only one cable is required by means of power supply via the network cable (PoE). The integrated microSD card slot can be used to record video directly on the camera.

Access to live images & recordings: secure and easy

The camera simply connects directly to the ABUS Link Station app on the smartphone or tablet via an encrypted end-to-end connection (E2E) - and without any settings on the router. With the Lite version of the app, up to 60 minutes of data stream (live view/playback) per month via Internet or Wi-Fi are completely free. Or with the ABUS Link Station Pro: Buy once and access unlimited data forever.
