

RACING WITH SAFETY

The Tec-Tical Pro 2.0 is a road helmet for cyclists with high demands.

A helmet developed for cycling professionals and ambitious racing cyclists. The combination of low weight, high wearing comfort, excellent ventilation and perfect safety makes the Tec-Tical Pro 2.0 the ideal race helmet for professional competition or ambitious sports use. Experiences gathered from inspirational collaborations and sponsorships in the world of professional sport feed into our product development, bringing thought-out products for recreational athletes into series production. The Tec-Tical Pro 2.0 is an excellent example of this.

Technologies

- Multi Shell In-Mold for durable bonding of multi-part outer shell and shock-absorbing helmet material (EPS)
- Multi Density helmet material (EPS) for low weight and optimized impact protection
- Increased stability through ABUS Safety Tech (AST) structural reinforcement
- Zoom - fine-adjustable, super-light height-adjustable adjustment system
- Size adjustment with half ring system
- Extremely good ventilation through 20 air inlets and 11 air outlets connected by particularly deep flow channels
- Removable and washable padding with maximum wearing comfort
- Soft straps that are simple to fit thanks to practical strap adjusters
- Removable visor (included)
- Passive safety due to reflectors with particularly high reflection effect
