CliffHanger MIPS metallic copper L

FOR DEMANDING TRAILS

The CliffHanger is the flagship trail model in the ABUS MTB series. When you're riding up and down steep hills on an enduro bike, the MTB helmet offers reliable protection.

Lighter, better ventilated and with an adjustable TriVider webbing spreader - the CliffHanger scores with these features. The special MTB adjustment system also ensures that the helmet sits comfortably and firmly on the head when rattling through the wildest of rock gardens. The inner shell made of EPS hard foam is foamed into a three-part outer shell, making a lightweight and sturdy helmet. The existing Multi-directional Impact Protection System (MIPS) can reduce energy by up to 40 percent in the event of an oblique impact.

With the CliffHanger, we have succeeded in developing a helmet that offers virtually perfect conditions for high speeds and demanding trails.

Technologies

- Multi-Shell In-Mould for a permanent bond between the outer shell and the shock-absorbing helmet material (EPS)
- Zoom Ace MTB: Height-adjustable adjustment system to fit the head circumference
- Ponytail compatibility: Helmet well suited for ponytail wearers
- Laterally adjustable, non-slip TriVider strap system
- MIPS: Impact protection that protects the brain, especially when the cyclist's head hits the ground at an angle during a fall.
- ActiCage: Structural reinforcement integrated in the EPS to optimise stability
- Moulded lower shell for added durability
