MORE PROTECTION FOR LITTLE ONES

Our best-selling helmet for small children just got even better! With a completely revised outer shape and adapted features, the Smiley 3.0 enters a new era.

The popular kids helmet accompanies children on their first attempts at riding - whether on a balance bike, a tricycle or their first own bike. The deep fit and visor-like front edge offers additional protection for a child's head. The helmet can be easily adjusted to the circumference of the head via the height-adjustable adjustment system - both in width and height at the back of the head. Another advantage of the height-adjustable adjustment system is for children with long hair, as this can make room for a ponytail. This stops the adjustment wheel from pressing annoyingly on a ponytail. The helmet is also made more comfortable to wear by a thick chin pad.

With 16 different themes, it'll be hard to choose which Smiley 3.0 should be part of your family. The shiny helmets are available with child-friendly patterns as well as in solid colours. With so much to choose from, every boy and girl will find a head guard they love to wear.

Technologies

- In-Mould for a permanent bond between the outer shell and the shock-absorbing helmet material (EPS)
- The helmet extends into the temple and neck area for better all-round protection
- Height-adjustable adjustment system with ponytail compatibility for riders with longer hair
- Zoom Ace Kids - height-adjustable adjustment system with non-slip adjustment wheel at the back of the head
- The size is adjusted via a ring made of robust and flexible plastic for optimum stability and adaptability
- Excellent ventilation with 4 air inlets and 4 air outlets
