

GRANIT Steel-O-Flex™ 1000/80

Technologies

- 25 mm thick, overlapping steel shells protect the internal steel cable
- Plastic coating to prevent damage to the bicycle's paintwork
- The shells, body and the structural parts of the locking mechanism are made of specially hardened steel
- ABUS Plus Cylinder for extremely high protection against manipulation, e.g. picking
- Automatic cover to protect the keyhole from contamination and corrosion

Usage

- Great protection at high theft risk
- Ideal for securing high-value bicycles
- The longer the cable, the easier the bicycle can be locked to a fixed object

Tips

- The lock can be ordered keyed alike with other locks, all of which are operated using the same key or locking method
- Due to the steel shells, the Steel-O-Flex™ locks reach a significantly higher security than common cable locks, yet maintaining high flexibility (Double Protection)
