

305 red

Technologies

- 5 mm locking bolt
- The locking bolt is made of specially hardened steel
- The lock body is made of impact-resistant cast metal
- Simple automatic locking mechanism with large push button
- ABUS quality cylinder with easy-to-use reversible key
- Two keys are included in the scope of delivery
- Manually operated keyhole cover to protect against dirt and corrosion

Usage

- Basic protection for when there is a low risk of theft
- Recommended for short parking periods when the scooter is within sight

Tips

- For increased security, the motorbike should be secured to a fixed object with another lock for longer parking periods
- Brake disc locks are the most compact type of motorbike lock which makes them easy to transport
