

83MAR/45

Technologies

- Lock body made of solid brass
- Stainless-steel shackle
- As required, either automatic locking = locking without a key by pressing down on the shackle, or key-retaining = locking only with a key (Z-bar)
- Extremely weather-resistant due to the full plastic coating, including cylinder protection and sealed shackle holes; drainage channels transport moisture that has penetrated the lock back out
- Shackle can be exchanged within seconds
- RK: cylinder can be re-keyed to match an existing key

Usage

- To secure assets and objects of greater value or those at a high risk of theft
- Suitable for industrial or commercial doors/gates, warehouses, trailers, containers and garages
- Ideal for severe weather conditions (e.g., in sea and port areas)
