

LIGHTWEIGHT YET HIGHLY EFFECTIVE PROTECTION AGAINST THEFT

Bad news for thieves: the GRANIT™ Plus 640 U-Lock offers superb protection against theft despite its diminutive weight

If you feel that every gram matters when you're buying a new bike, the wrong bike lock can play havoc with your calculations. But not the GRANIT™ Plus 640 U-Lock! This lightweight companion weighs in at a mere 860g, making it the perfect choice if you occasionally have to leave your bike in locations such as railway stations where the risk of theft is high. Intelligent technologies such as the picking-resistant Plus disc cylinder with automatic cover and Double Locking provide a high level of protection against tampering. The superior quality standard of the GRANIT™ Plus 640 U-Lock has been recognised in a great many different tests, with seals of approval awarded by OSIMZ (Russia) and test institutes in Finland, Sweden, Denmark, Norway and the United Kingdom.

Technologies

- Hardened 12 mm round shackle
- The shackle, the lock body and the structural parts of the locking mechanism are manufactured using specially hardened steel
- Priority given to the use of weight-optimised special alloys and lightweight materials
- ABUS Plus cylinder including automatic cover for maximum protection against attempts at manipulation, e.g. picking

Operation and use

- Great protection where there is a high risk of theft

GRANIT™ Plus 640/135HB150 black Sweden

Seite 2 von 2

- Ideal for securing high-value bicycles
- Lightweight courier's lock

Tips

- The lock can be ordered with other keyed-alike locks, all of which are operated using the same key or locking method
