FOR DEMANDING TRAILS

The CliffHanger is the flagship trail model in the ABUS MTB series. When you're riding up and down steep hills on an enduro bike, the MTB helmet offers excellent ventilation and protection.

Lighter, better ventilated and with an adjustable TriVider helmet straps - the CliffHanger scores with these features. The special MTB adjustment system also ensures that the helmet sits comfortably and firmly on the head when riding through the wildest of rock gardens. The inner shell made of EPS hard foam is foamed into a three-part outer shell, making a lightweight and rugged helmet. The multi-directional Impact Protection System (MIPS) can reduce energy by up to 40 percent in the event of an oblique impact.

With the CliffHanger, we have created a helmet perfect for gnarliest of trails.

Technologies

- Multi-Shell In-Mould for a permanent bond between the outer shell and the shock-absorbing helmet material (EPS)
- Zoom Ace MTB: Height-adjustable adjustment system to fit the head circumference
- Ponytail compatibility: Helmet well suited for ponytail wearers
- Laterally adjustable, non-slip TriVider strap system
- QUIN ready - easy upgrade with the separately available QUIN chip for fall detection
- MIPS: Impact protection that protects the brain, especially when the cyclist's head hits the ground at an angle during a fall.
- ActiCage: Structural reinforcement integrated in the EPS.
- Moulded lower shell for added durability
