

Alarmbox RC Remote Control black

Seite 1 von 2

CLEVER and LIGHTWEIGHT

The Alarmbox RC is an innovative, shock- and motion-sensitive 3D alarm unit for your bike.

The Alarmbox series is the perfect addition to your mechanical security. Whether a bicycle, scooter, tool chest or barbecue grill - the applications are numerous. The Alarmbox RC is easy to install and can be conveniently activated and deactivated with a remote control - a real added benefit. With one remote control, you can even operate several boxes at once. The intelligent calibration of the 100 dB loud alarm system only activates fully in the event of a persistent theft attempt. Accidental knocks and movements, on the other hand, trigger a short, 5-second alarm.

Technologies

- Alarmbox with remote control
- Alarm function with min. 100 dB for 15 seconds, followed by reactivation
- 3D position detection - detects vibrations and the smallest of movements in all three dimensions and triggers an alarm
- Smart alarm – the Alarmbox only emits a small warning beep in the event of minor and brief vibrations, e.g. if a football bounces nearby
- Convenient arming and disarming by remote control
- CR2 battery included (Alarmbox) / CR2032 battery included (remote control)
- Mounting option on a wide variety of shapes.
- Very lightweight, ideal for use protecting sports and outdoor gear.
- Various connection options such as cable ties, double-sided adhesive tape, Velcro, etc.

Usage

- Compact and easy to use alarm unit for flexible attachment to various objects
- Various connection options
