

WALL ANCHOR WITH WALL BRACKET: TWO ARE BETTER THAN ONE

Easy to install and handle, space-saving and secure.

With the WBA65 wall bracket and integrated anchor, you can secure your two-wheeler (e-bike, mountain bike, urban bike) in the garage or cellar in two ways at once. Because a lock from ABUS protects your bike even better when you connect it to a firmly anchored object. In public spaces, corresponding objects can quickly be found in the form of street lamps or bicycle stands, for example. But how do you secure your bike in the garage or bicycle cellar? You simply install our WBA65 where you need it. Now you can also lock your bike to a fixed object in the cellar with an ABUS bike lock. In the best case, it therefore is protected against theft by door, lock and anchor. The wall bracket not only makes the WBA65 a problem solver in terms of security, but also creates space by allowing the bike to be hung on the wall.

Technologies

- 10 mm thick shackle
- Holder for the rear wheel
- Simple installation without dowels

Use and application

- Recommended for securing e-bikes and sporty bicycles to the cellar and garage wall
 - Ideal for space-saving wall mounting
